EXPERIENCE

Full-Stack Developer

SiftMed

St. John's, NL

Aug. 2025 – Oct. 2026

Skills: TypeScript, NestJS, React, AWS, EventBridge, CloudWatch, REST, GraphQL, Salesforce, Docker, CircleCI

- **Developed** an evaluation tool for the company's **GenAI** features, gating releases against **hundreds** of test questions to catch quality regressions before they reach customers
- **Root-caused** critical bugs in the **OCR** and **AI** pipelines through **on-call** production support
- **Architected** a scalable **AWS Lambda/EventBridge** pipeline streaming per-account usage metrics into **Salesforce**, with **CloudWatch** alarms for fault tolerance, giving Customer Success real-time engagement visibility
- **Developed** a secure **REST** webhook and file-upload **API** allowing high-value customers to integrate report delivery and document uploads with their own software
- **Designed** a configurable formatting system for AI-generated case notes, giving customers control over how extracted data renders in their documentation and saving hours of manual editing per case

Digitalization Engineering Student

Cenovus Energy

St. John's, NL

May 2024 - Aug. 2024, Jan. 2025 – May 2025

Skills: Python, MATLAB, Databricks

- **Automated** the digitization of **1,600+** Mud Report and Bottomhole Assembly PDF/Excel files using **Python**, enhancing data accessibility and enabling streamlined dashboard development
- **Reworked** a **MATLAB**-based downhole vibration model in **Python**, enabling large-scale training and analysis in **Databricks** using structured Bottomhole Assembly datasets

Software Team Member

Paradigm (Student Group)

St. John's, NL

Sept. 2023 – July. 2024

Skills: ROS 2, Gazebo, C++, Pixhawk

- **Implemented** vehicle motion constraints in **Gazebo** using **ROS 2** to support realistic robotics simulation
- **Developed** embedded firmware for the **Pixhawk 6** controller to enable precise movement control

PROJECTS

TripTailor (Web App)

Skills: Go, React, PostgreSQL, OAuth2, Docker

- **Developed** a microservices-based platform for sharing and exploring travel itineraries, enhancing trip planning efficiency

earworm (Music Rating Mobile App)

Skills: Dart, Flutter, Google Cloud Platform, Firestore, MusicBrainz

- **Shipped** a music-focused mobile platform for album rating and real-time social interaction; onboarded **120** beta testers who reviewed over **500** albums
- **Engineered** real-time messaging and push notifications on **Firestore** and **Cloud Functions**, powering social interaction between users
- **Architected** a self-hosted **MusicBrainz** replication pipeline on **Google Compute Engine**, syncing album and artist metadata to power in-app search

INTERESTS

Enthusiastic about music and maintain a large vinyl collection. Enjoy cooking, particularly Italian dishes, as well as staying active and playing video games, including retro FPGA gaming.
